## INTRODUCTION

This is the seventh edition of the United States Sentencing Commission's *Sourcebook of Federal Sentencing Statistics*. This *Sourcebook* contains descriptive statistics on the application of the federal sentencing guidelines and provides selected district, circuit, and national sentencing data. The volume covers fiscal year 2002 (October 1, 2001, through September 30, 2002, hereinafter "2002").

The Commission collects and analyzes data on guideline sentences to support its varied activities. As authorized by Congress, the Commission's numerous research responsibilities include (1) the establishment of a research and development program to serve as a clearinghouse and information center for the collection, preparation, and dissemination of information on federal sentencing practices; (2) the publication of data concerning the sentencing process; (3) the systematic collection and dissemination of information concerning sentences actually imposed and the relationship of such sentences to the factors set forth in section 3553(a) of title 18, United States Code; and (4) the systematic collection and dissemination of information regarding the effectiveness of sentences imposed (28 U.S.C. § 995(a)).

The Sentencing Commission maintains a comprehensive, computerized data collection system which forms the basis for its clearinghouse of federal sentencing information and which, in large part, drives the agency's research mission. Pursuant to its authority under 28 U.S.C. §§ 994(w) and 995(a)(8), and after discussions with the Judicial Conference Committee on Criminal Law and the Administrative Office of the U.S. Courts, the Commission requested that each probation office in each judicial district submit the following documents on every offender sentenced under the guidelines:

- Indictment
- Presentence Report (PSR)
- Report on the Sentencing Hearing (statement of reasons for imposing sentence as required by 18 U.S.C. § 3553(c))
- Written Plea Agreement (if applicable)
- Judgment of Conviction

Data from these documents are extracted and coded for input into various databases. It should be noted that data collection is a dynamic rather than a static process. When research questions arise, the Commission either analyzes existing data or adds information to its monitoring system.

The Commission's computerized datasets, without individual identifiers, are available via tape and the Internet through the Inter-University Consortium for Political and Social Research at the University of Michigan (ICPSR) and the Federal Justice Statistics Resource Center.

## **Offender Dataset**

For each case in its **Offender Dataset**, the Commission routinely collects case identifiers, sentencing data, demographic variables, statutory information, the complete range of court guideline decisions, and departure information. Throughout 2002, the Commission continued to add data elements to its extensive computerized datafile on defendants sentenced under the guidelines.

The Commission's 2002 USSC Offender Dataset contains documentation on 64,366 cases sentenced under the Sentencing Reform Act between October 1, 2001, and September 30, 2002. A "case" is defined as one sentencing event for an individual defendant. While the 2002 reporting year includes cases sentenced between October 1, 2001, and September 30, 2002, it is important to note that the data collected and analyzed in the *2002 Annual Report* and *2002 Sourcebook of Sentencing Statistics* reflect only cases reported to the Commission (i.e., guidelines cases for which the courts forwarded appropriate documentation to the Commission). Consequently, if a court fails to forward documentation on a case to the Commission, the agency will not have a record of that particular sentencing. This reliance on physical receipt of court records by the Commission allows for three potential areas of guideline case underreporting: (1) court failure to submit case documentation; (2) a misunderstanding of the types of cases to be submitted; and (3) cases lost in-transit between a court and the Commission.

## **Organizational Dataset**

The **Organizational Dataset** captures information on organizations sentenced under Chapter Eight of the guidelines. The data collected describe organizational structure, size, and economic viability; offense of conviction; mode of adjudication; sanctions imposed; and application of the sentencing guidelines. The Commission received information on 252 organizations that were sentenced under Chapter Eight of the sentencing guidelines in 2002.

## **Appeals Dataset**

The **Appeals Dataset** tracks appellate review of sentencing decisions. Information captured in this module includes district, circuit, dates of appeal and opinion, legal issues, and the court's disposition. In addition to its standard data collection, the Commission often codes additional variables to study various discrete issues (e.g., drug offenses, criminal history). The Commission also tracks final opinions and orders, both published and unpublished, in federal criminal appeals. In 2002, the Commission gathered information on 6,834 appellate court cases of which 1,816 were "conviction only" cases.

The appeals data system uses both the "group" and the "defendant" units of analysis. Each group comprises individual records representing all codefendants participating in a consolidated appeal. Each defendant's record comprises the sentencing-related issues corresponding to that particular defendant. These records, linked together by a unique Commission-assigned appeals identification number, constitute a single group.

<sup>1</sup> Using the Internet address <http://www.JCPSR.umich.edu/NACJD/archive.html> or <http://fjsrc.urban.org/> Commission datasets can be accessed.

## FILE STRUCTURE

*Monitoring of Federal Criminal Sentences, 2002* contains two data files. The main data file contains 302 variables and 64,366 cases. Each record in the file is 975 characters long.

The supplemental data file is large and contains mostly missing data. This is because the file is rectangular, and its size is based on the case with the most information. There are 3,618 variables and 64,366 cases. Each record is 8,160 characters long.

## CODEBOOK NOTES

Some values in the data are outside of the ranges stated in this codebook. These discrepancies had not been resolved by the date of release of the study. Users of the data are encouraged to review both the codebook and the original USSC supplied documentation, which follows the codebook.

The variables in the supplemental file repeat several times and are indexed from 1 to n. Variables are listed in groups, and the code labels for them are listed once at the end of the group.

***OFFICE OF POLICY ANALYSIS  
UNITED STATES SENTENCING COMMISSION***

**VARIABLE CODEBOOK**

**STANDARDIZED RESEARCH DATA FILES FOR  
FISCAL YEARS 1999 - 2002**

## INTRODUCTION

The United States Sentencing Commission collects demographic, sentencing, and guideline application information on cases which are sentenced under the guidelines in the federal court system. Understanding the federal sentencing guidelines is crucial to properly using the Commission's data. To learn more about the Commission and the federal sentencing guidelines, please visit the Commission's website, [www.ussc.gov](http://www.ussc.gov), and read through the Guideline's Manuals, Annual Reports, and Sourcebooks as well as various on-line training materials and reports.

This codebook contains information on variables which come directly from the Office of Monitoring's individual offender's database, as well as variables created by the Office of Policy Analysis (OPA) specifically for research purposes. Since the Commission switched data entry systems from FoxPro to Oracle in fiscal year 1999, several significant variable and coding changes were instituted. Therefore, this codebook covers only the fiscal years since the 1999 datafile. See our older standardized research codebook for fiscal years 1991 - 1998. Datasets prior to 1991 do not contain many important guideline application variables, therefore, these datasets are not covered by either the old or the new codebook.

The first column in the codebook, NAME, lists the SAS name of the each variable in alphabetical order. Under the monitoring variable names, the corresponding research variable name (if one exists) will be listed as: R=Research variable name.

The second column, ORIGIN, lists the source of the variable. Variables are either taken from a specific monitoring module, generated from the Monitoring database, or produced by OPA SAS code. This column also includes information on the source document of the raw data. The following list defines the codes for variable origins.

- JC means the information for the variable is obtained solely from the Judgment and Conviction Order.
- PSR states the information for this variable comes only from the Presentencing Report generated by the probation officer.
- JC/PSR indicates the information may be found either on the Judgment and Conviction Order or in the Presentencing Report, with the Judgment and Conviction Order given preference if the information conflicts.
- SOR indicates that the information for the variable is taken only from the Statement of Reasons.
- PSR/SOR means the information for this variable comes from the PSR, but the SOR information is used if it is present and/or conflicts with the PSR.
- PLEA indicates the information comes primarily from the plea agreement.
- PLEA/PSR indicates the information comes from the plea agreement if present, or the PSR if not present.
- SENT indicates the information comes primarily from the resentencing documents.
- MON indicates the information is coded in the Monitoring Department directly from the documents.

- R indicates the information is generated from other coded variables via SAS code written in the Office of Policy Analysis (OPA). These are referred to as the “research variables”.

The third column, FORM, describes whether the variable is coded as numeric (NUM) or character (CHAR). This column also lists the length of each variable.

The fourth column, CODES, lists all the values for each variable and describes what those values mean. Some of the variables have a large number of values, so these values are listed in the coding attachment at the end of the codebook.

The final column, DESCRIPTION, describes the uses and creation of each variable. This column also contains notes which caution users about variables which have changed definitions from previous years, or are not contained on all years of the data sets. Format statements are also included in bold at the end of each description. These formats will allow users to access the format statements in SAS from the Sun station. The user will type "FORMAT VARIABLENAME BOLDNAME.;" to use these format statements (Note the need for a \$ sign when formatting character variables). Since format statements cannot end in a number, all variables which end in a number "1" will have format statements that end with an "O". Variables which end with a "2" will have format statements ending in "T."

Other sections have been included after the codebook to elaborate on variable information. A code attachment which provides values of lengthy variables follows the codebook. After the code attachment, the code for creating each research variable from the monitoring variables is included. A special section containing helpful SAS fragments has also been added. Additionally, an index has been created to facilitate finding any and all references to a particular variable. Both variables names (ex. MONSEX) and subject headings (ex. GENDER) have been included.

**NEW TO THE POST 1998 CODEBOOKS:**

- 
- Document status variables have been renamed or added, and some new codes have been added. The new document status variables are: DSAPPEAL, DSIND, DSJANDC, DSPSR, DSSOR, and DSPLEA.
- 
- Instead of only collecting the five most serious guideline computations, all of the guidelines applied and their corresponding adjustments are now being coded (e.g. GDLIN1-GDLINEX).
  - The Commission is now collecting up to three statutes, the statutory minimum and maximum and the beginning and ending dates of the offense for each count of conviction. All counts of conviction are being collected now (e.g. STA1\_1-STA1\_XXX).
  - Expanded lists of codes for place of citizenship (CITWHERE) and type of drug (DRUGTYP1-DRUGTYP5).
  - Drug range amounts (DAFROM1-DAFROM5 and DATO1-DATO5) and units (DUFROM1-DUFROM5 and DUTO1-DUTO5) are now being recorded. In FY02 variables were added to capture chemical type (CHEMTYP1-CHEMTYP5), “other” text field chemical names (CDESCRIP1-CDESCRIP5), chemical amount (CHMAM1-CHMAM5), as well as chemical range amounts when the exact weight is not known (CAFROM1-CAFROM5 and CATO1-CATO5).
  - Judge and offender name fields are now divided up into several fields (e.g. JNAME\_F, JNAME\_L, JNAME\_M).
  - PSR variables for final offense level, criminal history points, and criminal history category are no longer being coded.
  - Marital status (MARRIED), Parole/Supervised Release revocation (REVOC) and pre-sentence detention (PRESENT) are now being coded.
  - A text field variable describing reason for departure if REASON1-REASON3 is “Other” is now included (REASTXT1-REASTXT3).
  - Variables MONTAG1-MONTAG10, which indicate an unresolved problem in the case, replace TAGREAS1-TAGREAS5. There is also a corresponding text field variable called MTDESC1-MTDESC10. Similarly, variables ABERCASE and ABERTXT indicate any aberration in the case.
  - Inapplicable and Missing/Indeterminable Codes are set to “.” for almost all numeric variables and ‘ ’ for almost all character variables.
  - AMENDYR is a 4-digit numeric field instead of 2 digits.
  - DESCRIP1-DESCRIP5 is the text description of the drug type when “Other” is coded for DRUGTYP1-DRUGTYP5.
  - Dropped the variables DSAPPEAL and REVOC from the datafiles due to low reliability or time lag in receiving info.
-

**NEW TO THE 2002 CODEBOOK:**

- The variable which denotes whether or not a defendant has received the safety valve (SAFE) has been changed to reflect whether the offender received the benefit of being sentenced below the applicable mandatory minimum in the “Old Safety Valve” as specified in §5C1.2, or whether he received the benefits of the “New Safety Valve” as depicted as a specific offense characteristic in §2D1.1. A yes/no dummy variable was also created called SAFETY.
- Additional codes for DRUGTYP1-DRUGTYP5 have been added as well as CHEMTYP1-CHEMTYP5 which denotes the type of chemical involved in §2D1.11 cases. Accompanying variables are CHMAM1-CHMAM5 (chemical amount), CUNIT1-CUNIT5 (unit of measure), CAFROM1-CAFROM5 and CATO1-CATO5 (low and high amounts for cases where only a range of chemical amount is available), and CDESRIP1-CDESCRIP5 (text description of chemical if coded as “other” for CHEMTYP1-CHEMTYP5).
- TIMSERVD is the amount of time served credit granted by the judge at sentencing in days and TIMSERVM is the amount of time served credit granted by the judge at sentencing in months. SENTTOT, SENTTOT0, SENSPLT, and SENSPLT0 now add values from TOTDAYS, TOTPRISN, TIMSERVD, and TIMSERVM to get the total time of imprisonment.
- ORIGDATE is the date that a case is received in the fileroom of the Office of Monitoring. RECDATE is the date that the case is processed in the fileroom (fileroom technicians enter demographic and identifying information about the case). CODEDATE is the date that the case is analytically processed (when information about the guideline application and sentence is originally entered into the system). UPDDATE is the date that the case was last “touched” or updated.
- Changes were made to the way that RANGEPT assigned cases in certain categories. Ask Christine Kitchens or Patrick Smith to see creation code comments for further details.
- The new repeat sex offender provisions in §4B1.5 of the *USSC Guidelines Manual* have been incorporated as the variables SEXOFFNA and SEXOFFNB.

## **EXPLANATION OF THE GUIDELINE CODING SYSTEM (IMPLEMENTED IN 1995):**

In 1995, a new coding system was implemented by the Monitoring Department in order to more accurately capture the guideline cross reference system. The Monitoring Department now codes four types of guidelines: Statutory, Reference, Sentencing, and Underlying.

The first guideline coded is known as the statutory guideline (GDSTAT1-GDSTATXX<sup>1</sup>, GDSTATHI). This guideline is based on the statute(s) of conviction. GDSTAT is the first guideline checked for applicability by the probation officer from the statutory reference list in the back of the *USSG Manual*. Only the guideline is captured for GDSTAT (i.e. no base offense level or adjustments).

The next guideline is the reference guideline (GDREF1-GDREFXX<sup>2</sup>, GDREFHI), coded when applicable. This guideline is only used when the statutory guideline (GDSTAT) refers the probation officer to another guideline (ex. If the statute of conviction is 21:843(b), then the probation officer would go in the USSG Manual to 2D1.6 (the GDSTAT1 guideline). This guideline then refers the probation officer to 2D1.1 (the GDREF1 guideline) in order to find the correct base offense level. All aspects of the reference guideline are captured (i.e. base offense level and adjustments).

The guideline which best explains the sentence (i.e. the last guideline which increases or decreases levels) is known as the sentencing guideline (GDLINE1-GDLINEXX<sup>3</sup>, GDLINEHI). The GDLINE will be the same as the GDSTAT if no reference guideline (GDREF) is used (i.e. the probation officer begins and ends at the same guideline, and does not pick up a base offense level or any adjustments from any other guideline). All aspects of GDLINE are coded (i.e. base offense level and adjustments).

## **EXAMPLES OF THE GUIDELINE CODING SYSTEM:**

1. If the defendant was convicted of selling drugs near a school, then the GDSTATHI would be 2D1.2, the GDREFHI would be 2D1.1, and the GDLINEHI would be 2D1.2.
2. If the defendant was convicted of a conspiracy charge while he had escaped from incarceration, the GDSTATHI would be 2X1.1, the GDREFHI might be 2J1.7, and the GDLINEHI would be 2X1.1.

**NOTE: If the defendant did not receive a 2 level decrease from 2X1.1, then the GDLINEHI would be 2J1.7 because that guideline would provide the last adjustments to the sentence.**

<sup>2</sup> Prior to 1999, only five reference guideline computations were coded.

Therefore, just because this variable is coded as a '0' does not mean that it will never have a re-sentencing, only that the Commission currently does not have any re-sentencing documents for this case.  <b>FORMAT: RESNTDOC.</b>

## ATTACHMENT II FOR DRUGMIN, GUNMIN1 AND GUNMIN2

OPAFY93 - OPAFY99 now includes DRUGMIN, GUNMIN1, and GUNMIN2. DRUGMIN represents mandatory minima associated with drug statutes. GUNMIN1 represents mandatory minima associated with 18 924 C, and GUNMIN2 represents mandatory minima associated with 18 924 E.

An edit report is run on the ongoing data files to identify guns and drugs cases as well as a few stray cases with anomalous values. The edit report lists out all cases where DRUGMIN is 997. DRUGMIN has been previously set to 997 through the process described in this writeup. These cases are then turned over to the special projects group for editing through the guns-and-drugs program JSMIN. Once a case has been edited, the values of DRUGMIN, GUNMIN1, and GUNMIN2 will not be reset.

The presence of 997 in DRUGMIN should be taken to mean that the case was a guns and drugs case or problem case as described below and was either not edited or could not be resolved.

At update time in Module 2 and Module 3, the values of DRUGMIN, GUNMIN1, and GUNMIN2 are set through program GUNDRGUP as described below, unless the case has already been edited through JSMIN.

1. The program determines the value of IS924. Codes are as follows:

- 0 = No 18 924 C or 18 924 E statutes present
- 1 = Only 18 924 c present
- 2 = Only 18 924 e present (can include 18 922 g)
- 3 = 18 924 c and other statutes (no 18 924 e)
- 4 = 18 924 e and other statutes (no 18 924 c)
- 5 = 18 924 c and 18 924 e only (can include 18 922 g)
- 6 = 18 924 e and 18 924 c and other statutes
- 9 = Missing/indeterminable

2. The program checks the case statutes and determines whether this is a drug case, that is, if the case has been sentenced under any of the statutes listed below. If so, the coder would have been permitted to enter drug types.

- 1. Any title 21
- 2. 18 924
- 3. 18 922
- 4. 18 1956
- 5. 18 4
- 6. 18 371
- 7. 18 1962
- 8. 18 545
- 9. 18 3146
- 10. 18 1952
- 11. 46 1903
- 12. 7 2024 B
- 13. 18 1343
- 14. 18 1503
- 15. 18 201 C1B
- 16. 18 1905
- 17. 19 1433 B2B
- 18. 19 1436 A1
- 19. 19 1436 C
- 20. 18 1512 B1
- 21. 18 3

3. The program determines whether this is a guns-and-drugs case. All of the following conditions must be met:

- a. The case was sentenced on or after 10/1/92.
- b. At least one of the statutes of conviction is considered to involve drugs as described above.
- c. The 18 924 C or E statutes are present, alone or with other statutes (IS924 is 1-6).
- d. The statutory minimum (STATMIN) is 1-59, or 61-996.
- e. It is not the case that 18 924 E is present without 18 924 C and the statutory minimum is 180.
- f. It is not the case that 18 924 C is present without 18 924 E and the statutory minimum is 60.

If this is a guns-and-drugs case, DRUGMIN, GUNMIN1, and GUNMIN2 are set to 997 and will appear on the edit report.

4. If the case does not meet the guns and drugs conditions above, DRUGMIN, GUNMIN1, and GUNMIN2 are reset as follows.

- a. If the case was sentenced before 10/1/92, DRUGMIN, GUNMIN1, and GUNMIN2 are set to inapplicable (998).
- b. If the statutory minimum (STATMIN) is 0 and there are no 18 924 C or 18 924 E statutes present (IS924 is 0), DRUGMIN, GUNMIN1, and GUNMIN2 are set to 0.
- c. If the statutory minimum (STATMIN) is 999, DRUGMIN, GUNMIN1, and GUNMIN2 are set to missing (999).
- d. If statute 18 924 C is present alone or with other statutes, but 18 924 E is not present (IS924 is 1 or 3), and the statutory minimum (STATMIN) is 60 months, DRUGMIN and GUNMIN2 are set to 0. GUNMIN1 is set to the statutory minimum.
- e. If statute 18 924 E is present alone or with other statutes, but 18 924 C is not present (IS924 is 2 or 4), and the statutory minimum (STATMIN) is 180 months, DRUGMIN is set to 997, and will appear on the edit report. GUNMIN1 is set to 0. GUNMIN2 is set to the statutory minimum.
- f. If only statute 18 924 E is present, and the statutory minimum is 60, DRUGMIN, GUNMIN1, and GUNMIN2 are set to 997, and will appear on the edit report.
- g. If none of the conditions above have been met, the program temporarily sets DRUGMIN, GUNMIN1, and GUNMIN2 to 997, for possible appearance on the edit report.
- h. If the values of DRUGMIN, GUNMIN1, and GUNMIN2 have not been set through steps a - f above, the program carries out the following resetting.

If the case is a drug case, but is not defined as a gun case, and the sentencing date is on or after 10/1/92, and the statutory minimum is positive (STATMIN is 1 to 997), DRUGMIN is set to the statutory minimum. GUNMIN1 and GUNMIN2 are set to 0.
